

Enable Email Authentication On BlackBerry Device

What Is Email Authentication?

One such method is email authentication, along with a wide set of other tools used by email senders and receivers to establish sender reputation. All major ISP's like Hotmail, Gmail, AOL, use email authentication to filter out suspected spam emails.

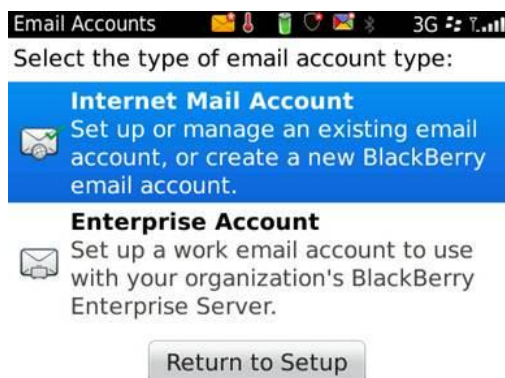

Gibtelecom has implemented email authentication on the sending of emails as done currently on the mailbox content retrieval, which will help validate emails sent by our customers are originating from a legitimate source

How To Enable Email Authentication On Your Mail Client

1. On the main screen go to **SETUP**

2. Select **Email Accounts**, then **Internet Mail Account**

3. Select **EDIT** on your Gibtelecom Account

4. Scroll to the bottom and select **Advanced Settings**

Edit @gibtelecom.net ... 3G

Password: ?

Signature: ?
 Sent from my BlackBerry® smartphone

Auto BCC to: ?
 (Note: Separate multiple addresses with a semi-colon)

Deleted items: ?
 Synchronize deleted items between this mailbox and my device.

Advanced Settings

Save Cancel
