

Global Private Network

In today's business world, offices and customers are located across the world in distributed offices. Our private network and distributed PoPs connect many of the world's primary business centres. Are you looking to interconnect globally distributed customers or offices with guaranteed SLAs? At Gibtelecom our internationally expanding data centre footprint and cloud platform base is connected to some of the world's fastest and most reliable submarine cables.

Making use of a global private network can help to facilitate your business plans, provide enhanced customer experience and enable growth in bandwidth to meet the demands of global connectivity.

Gibtelecom owns and manages a private network infrastructure which enables our customers in many of today's leading business centres to securely scale and grow their operations into new markets and locations.

Our core network is based around the Europe India Gateway (EIG) submarine cable system linking Europe, Africa, Middle East and India. Gibtelecom is a founding consortium member of the EIG. In addition to this our network has multiple redundant European connections as well as a partnership which provides direct global access to the leading hyper-scale providers.

Benefits of Gibtelecom's Global Private Network:

Directly connect to over 25 locations in Europe, Africa, Middle East and Asia

Choice of locations to suit business, customer, regulatory or latency requirements

Fully integrated with the global hyper-scale providers, including Amazon Web Services, Microsoft Azure and Google Cloud

End-to-End SLAs

Enhanced reliability, security and reduced latency

European Private Network

2. Bude, United Kingdom
3. Lisbon, Portuga
4. Gibraltar
5. Madrid, Spain
6. Estapona, Spain
7. Marseille, France
8. Monaco

Network PoPs - Africa

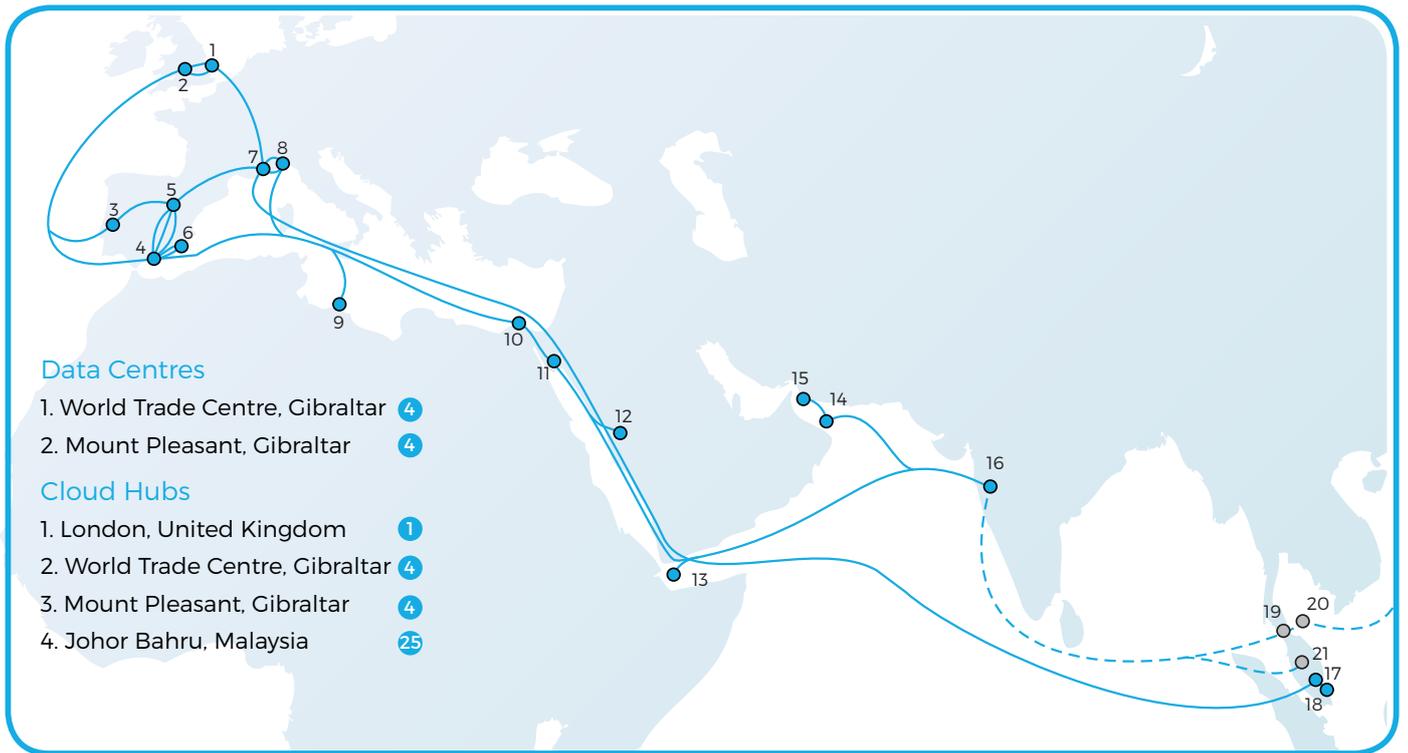

9. Tripoli, Libya

Gibtelecom's connected cloud hubs

As business-critical applications and content increasingly move into the cloud, today's globally distributed enterprises need increased performance, flexibility, predictability and security.

Gibtelecom's expanding cloud hubs are connected through our Private Global Network, private connections mitigate the need to use unreliable internet connections giving you increased security, performance and peace of mind.

In addition to our own cloud hubs, Gibtelecom's Cloud Connect service brings global hyper-scale providers (including Amazon Web Services, Microsoft Azure and Google Cloud) together with enterprise customers. Enterprises and software-as-a-service (SaaS) customers can connect directly with global private or hybrid cloud services, extending their applications over what would look and operate like a local area network.

European India Gateway (EIG)

The Europe India Gateway (EIG) is a cable system designed for the 21st century to meet the needs of modern telecommunications companies.

The first direct, high-bandwidth optical-fibre undersea cable system from United Kingdom to India. The 700 Million USD Europe India Gateway (EIG) cable system has significantly enhanced capacity and diversity between the countries of three continents.

EIG, a 15,000 km international fibre optic submarine cable, is the first high band-width (3.84 terabits per second) cable system using dense wavelength division multiplexing technology connecting Europe, Africa, Middle East and India.

Who owns the Europe India Gateway

EIG is a consortium of 18 companies: AT&T, Airtel (Bharti), Bharat Sanchar Nigam Ltd. (BSNL), BT, Djibouti Telecom, du, Gibtelecom, Libya International Telecommunications Company, MTN, Omantel, Portugal Telecom, Saudi Telecom, Telecom Egypt, Telkom South Africa, Verizon, Vodafone.

Globally interconnected cloud services & hosting

WHY USE GIBTELECOM?

Gibtelecom provides customers with best in breed data centre facilities, managed solutions coupled with fast and highly resilient global network connections needed by today's internationally connected organisations.

Gibtelecom's internationally expanding data centre footprint, head quartered in Gibraltar, is connected to many of the world's largest business and financial centres by the fastest and most reliable submarine cables.

- ✓ State of the art facilities supported by over a decade of experience
- ✓ Gibraltar based with international cloud platform
- ✓ Flexible and scalable solutions designed to meet your budget and objectives
- ✓ Founder member of the Europe India Gateway (EIG) submarine cable consortium
- ✓ On site and remote support capabilities
- ✓ Personalised service
- ✓ Access to industry certified professionals who understand your business and environment
- ✓ Custom plans available
