Gibtelecom

Business mobile plans

Keep your workforce connected with our business mobile plans, which all include calls, texts and generous data options, enabling your teams to be reachable and productive wherever they may be.

MONTHLY PRICE	DATA ALLOWANCE	LOCAL MINUTES	TEXT MESSAGES
£20	50GB	100	100
£30	100GB	250	250
£40	150GB	500	500
£50	200GB	750	750
£60	300GB	1000	1000

With an extensive mobile roaming network you can use your Gibtelecom mobile abroad, with no additional charges when roaming within the European Economic Area (EEA).

You can also set customisable, individual data roaming caps for your employees when travelling outside of the EEA to control roaming spend.

Speak to our team about volume discounts if you have a large amount of plans.

Data-only SIMs

We also have a range of data-only SIM packages available for tablets and other devices which may require a data connection ranging from 500MB to 250GB data allowances.

These include fixed IP data packages allowing you to set VPNs and secure data connections on mobile devices to support your business operations.

NB-IoT

Connect your IoT devices to the internet, and unleash new capabilities.

With technology advancing to create the Internet of Things (IoT), it is now possible for everyday objects to connect and exchange data. These smart objects are embedded with sensors, software, and other technologies to connect and exchange data with similar systems and devices over a communications network, usually the internet.

NarrowBand-Internet of Things (NB-IoT) is a standards-based low power wide area (LPWA) technology developed to enable a wide range of new IoT devices and services. NB-IoT significantly improves the power consumption of user devices - battery life of more than 10 years can be supported for a wide range of use cases. It also benefits from all the security and privacy features of mobile networks, such as support for user identity confidentiality, entity authentication, confidentiality, data integrity, and mobile equipment identification.

Gibtelecom

Use cases:

- Smart metering
- Smart city
- Parking management
- Logistics
- Personal appliances
- Health devices
- Industrial appliances

Gibtelecom has developed an NB-IoT solution running on the Gibtel mobile network which provides full coverage of the Rock. Our dedicated team will assist with deployment, setting up test SIMs for you so you can fully trial the solution ahead of committing to an order. The solution is flexible and scalable and fully managed by us.

Pricing is competitive, with an annual price per SIM, dependent on volume of SIMs required.

Bulk SMS

Reliable messaging for your customers.

Gibtelecom offers a bulk SMS API solution which allows you to send secure SMS messages direct to your customer base.
